

Please note that several of the application criteria differ from the actual language in the South Florida Water Management's (District) M/WBE Rule. Statutory changes were passed by the legislature that the District must apply, i.e. size requirement.

The District will begin the process of Rule Development next month to update our Rule and bring it into compliance with the statutory requirements in Chapter 287, F.S.. The District is bound to follow the legislative mandates. You will receive additional information in the upcoming months regarding the Rulemaking process that will encompass the required changes to the Rule as well as any additional changes to the rule. The District welcomes your input into the rulemaking process.
